PI: Insect bites

AV: I have tried RVing the contents of envelope CY8608, using relaxation methods. Repeatedly, there have been visuals of a (balcony/upper floor apartment/penthouse/etc.) w/possibly several people present. One in particular is young, either female or an effeminate male who seems dressed all in white (not like a nurse's uniform, but in casual clothes). The vista from the "balcony" or window seems to overlook water.

SESSION WAS PERFORMED ON THE COMPUTER TERMINAL, SO IDEOGRAMS DO NOT SHOW. SKETCHES ARE INCLUDED ON SEPARATE SHEETS OF PAPER.

appreciation of  
3-D feeling of  
site. "Spatial"  
feeling (size,

it a certain  
flavor of time  
feeling, as well.  
Time seems mixed  
up with it, some  
way.

Interim summary: Person at site seems to be there of his own free will, and seems to be somehow "in charge" of something, though he may not be in charge of this situation. Site location seems virtually empty, except for high area (possibly upper floor of bldg), where this person is. Person seems to be able to look out from where he/she (still undetermined) is onto a relatively open area.

## STAGE 4 1/2

Person is thinking of an area with some hills or mountains. Is thinking of another person, considering his/her relationship with that person, and what it means on his/her future. Other person seems to be a male. Don't understand why I can't determine gender of this person. Other person is perceived as wearing blue. He/she has a vague feeling about the other person which has a "waxey feel" component (I don't understand 'em, I just repeat what I get.) Other person seems far away. He/she is wondering what, if any, lasting impact on life will be caused by this (other) person (Same feelings involved as though this person were considering some sort of business transaction.)

AOL BREAK: The "access to his/her thoughts" sure feels valid, but would logically guess that I have probably gone into AOL drive caused by the AOL of the Chinese RVer.

BREAK: 0848

RESUME: 0855

P.I.: The time element of this session is becoming a real P.I. The amount of backing up of computer files necessary to meet the deadline is becoming a real pressure, and has seriously begun to make itself known on this session. Am going to therefore end the session as of 0855 hrs.
